

Scottish Recovery Network

Scottish Recovery Indicator

Indicators of Progress

The Scottish Recovery Indicator

Thursday 20th November 08 George Hotel Edinburgh

---

The Scottish Government made a commitment to address the culture of mental health services by introducing a tool that would help services to examine how they performed in relation to recovery, social inclusion, rights and equality.

This event will describe progress towards achieving this commitment.

It will provide feedback on

- The selection of a tool and adjustment for Scottish use
- The piloting phase in 5 Health Board areas
- Report on evaluation findings and recommendations
- Describe the inclusive redevelopment process
- Explain how the tool will be supported and rolled out

This event will be relevant to you if you use, plan or deliver mental health services in Scotland.
