

Conference Bulletin - Russian Art therapy presented by Psychotherapists from St. Petersburg. Introduction to Digital Story Telling by Karen Barrie NHS Scotland - and more...

The [Observer Effect Conference](#) is edging closer - **22nd and 23rd of August** exploring how we use stories and captured images in therapy and as a teaching tool. We have a great line up - 3 presenters coming from St Petersburg, Karen Barrie from NHS Scotland and some extremely funky and interesting locals offering their interpretive eye. We have a growing band of participants including art & drama therapists, social workers, university lecturers/researchers and teachers. This promises to be a rich tapestry of minds and offers a real opportunity to explore the cutting edge of art and narrative therapy.

The conference venue is the award winning Moray Art Centre located on the beautiful Findhorn peninsula only 40 minutes from Inverness airport.

Closing date for bookings is 21st July & there are still some places available.

e-mail eyeforachange@yahoo.co.uk and we will send you more information & everything you need to book your place.

This is a not for profit event run by an art therapist and a social worker for people who want to explore and expand knowledge, techniques and inter-cultural relations.

Charles McKerron and Beverley A'Court.
